

Bending Plywood Specifications

Product Information

Complex designs are made easy with our cross-grain and long-grain Bending Plywood. More commonly referred to as Barrel and Column plywood, respectively, these bending panels are produced from Falcata and Meranti wood and provide the flexibility you need for any design application. This plywood can also be covered with a wide range of laminates or paper-backed veneers to get the finished look you need.

Applications

The perfect solution for curved columns, arches, cabinetry, and furniture in both residential and commercial settings, bending plywood is designed to flex in different directions without cracking, and it can take on the shape of nearly any contour.

Origin	Species	Finish	Size	Core
Indonesia	Falcata	Barrel, Column	8'x4', 4'x8'	Meranti

Veneer Cut	Veneer Thickness	Thickness Tolerance	Surface Sanding	Glue Type	Moisture Content
WPF	4.0mm	7.5mm-8.2mm	240 - 320 grit finish	Interior, TSCA Title VI / EPA (Carb)	<12%

Thickness	# of Plies	Sheets per Crate
8mm	3	110
